

Unique Surfing: Safari

Safari is the Internet browser provided by Apple. Apple is known for its elegant products such as iPhone, iPod, Macintosh etc. Similar to other products Apple has maintained their quality in Safari too.

Safari is internet browser radiating uniqueness in every part such as in Safari main window, interface, downloading style, warning window, buttons and also presentation of text too. Even simple web page looks beautiful in Safari.

Apple claims that, Safari is world's fastest browser. Now, Windows users must be thinking that if this browser is created by Apple, it must be useful for Macintosh users only. Fortunately, this version Safari 3.1 is made for both Macintosh and Windows operating system. Moreover, this fastest browser is available for free.
