

## Be Secured: AVG

---

AVG is antivirus created by AVG technologies. AVG have different editions of antivirus which includes free edition and paid edition.

When we here free antivirus, generally, consider it as a 'champu' antivirus which is incapable of holding the name antivirus. But when it comes to 'AVG Free' we get amazed to see its fully loaded features.

Free version AVG 8.0 is launched about in March 2008. Its features list is as below:

1. Antivirus :- Against viruses, worms, trojans etc.
2. Antispyware :- Against spyware, adware and malicious program.
3. Email Scanner :- Scans incoming and outgoing emails.
4. Link Scanner :- Blocks dangerous websites and scans every result of popular search engines.

Moreover, we can download free updates for AVG just by pressing update now button. If you keep automatic update ON then it can automatically download newer updates. The newer updates are available almost daily.

From AVG site we can download this antivirus and also its updates manually.

Most important point, AVG Free is legal to use on home non-commercial computers. For commercial use you have to purchase paid copy of AVG whose information is on site.
